## Rotifer Culturing System

### Overview

Rotifers are a critical first feed for many fish larvae, including Zebrafish. This compactly designed system allows for an easy, effective, and efficient live feed production setup for any size or type of facility. Grow, scale, and harvest your rotifers with this low-maintenance cone.

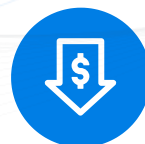

Optimally shaped  
for circulation

High density  
harvest yields

Versatile & easy  
to maintain

Durable &  
affordable

Transportable

### Additionally, you will also need to have on-hand:

- Saltwater
- Rotifers (rotifer cysts, available from us)
- Feed for the rotifers (microalgae, available from us)
- Harvesting filter/sieve, air pump/tubing, floss/filter pad
